DG PRINTING

COMPANY PHILOSOPHY

THE VALUES OF SER.TEC. GROUP

How SER. TEC. born and evolve

SER.TEC., young and dynamic company, was founded in 1993 with the intention to stand in the screen printing industry. Since the first machines produced we stood out for research and innovation, characteristics that identify us until today.

Currently our company produce screen printing machines to print on plastic, glass, wood, tissue, dryers and printing equipment.

As a result of the strong growth and acquired experience, we decided to develop a branch entirely dedicated to digital printing: **DPI DG Printing**.

DPI DG Printing takes care of the digital printing, with specialized technicians that constantly work at R&D department to continuously improve the technology in our products. **DPI DG Printing** following the demands of the market has created a line of printers: "The Eagle", developed to be reliable, fast and customizable. We have also developed technical and design patents and created a dedicated professional print software: "WhiteRIP".

All **Ser.Tec. Group** machines are developed and manufactured in Italy, with the aid of the most advanced technologies on the market. Our big secrets are twenty years of experience in various fields of print and the complete control of the production process, this enables us to offer products that anticipate the needs of the market.

Our departments works close and this allows us create special printing systems that integrate automations or customized printing solutions for both digital and screen printing.

We have created a global network of distributors and technicians, selected to meet the highest standards of competence in their respective sectors. They are directly in contact with the head office and constantly update with technical and sales training.

CREATIVE LAB

OUR PERMANENT SHOW-ROOM

The show begin from here

Here the imagination and fantasy are the masters; The Creative Lab is an inspiration place that gathers a lot of products realizable with our technology ... you will find the applications that you want to achieve, new markets and potentiality that you have not considered yet.

A free space where you can touch the existing applications and where you can experiment new production techniques, in the common interest of growth and widening technical and commercial horizons.

EXPOSITIVE AREA

OF NEW EQUIPMENT

At our headquarters we have more than 1500 square meters of expositive area with new printing equipment.

We have all the equipment to cover the entire printing process, from the preparations to the post printing equipment as well as printer of all sizes and typology.

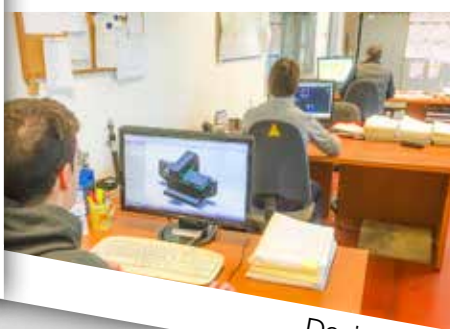

PRODUCTION

PROCESS

At Ser.Tec. we create all parts of the machine. The designing, the carpentry works, the electrical boards and the assembly are made in our headquarters in Italy by our specialized technicians.

SOLUTIONS

OUR TECHNOLOGY

We produce high quality digital printers, screen printer machines and equipment.

Here we have included some of our best products about digital printing, screen printing, equipment and some example of what you can print with our printers.

• THE EAGLE SERIES

The Eagle, unlike normal printers, was created to answer to industrial needs of flexible and high quality prints without reduce the output volumes. The Eagle versatility comes from both the variable height up to 250mm and the high performance inks. Moreover the unique design of The Eagle with one side completely open allow to insert very bulky materials.

SOFTWARE

WHITERIP

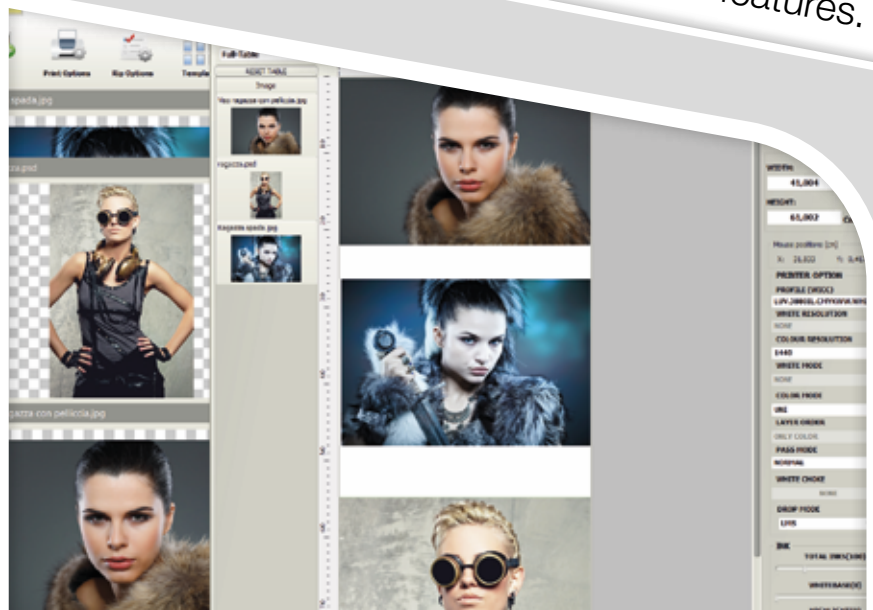

We struggled to find the right software with user-friendly interface and advanced function to make the best from our digital printers. Thanks to the collaboration with EvNetwork we have been able to have a tailored software that fully met our requirements. Now all of our printer are sold with a dedicated version of WhiteRIP software and we continue to collaborate with EvNetwork for constantly improve the software.

The main advantages of WhiteRIP are:

- Automated white layer generation, with optimization for the various fields of use and support color.
- Template for virtually split the table in smaller area to print many small object with a precise and constant positioning. This allow to reduce time for the positioning of the objects and the preparation of the graphics.
- Inline printing to save 50% on printing time. Print white and color layer together, with bright colors and an incredible speed.
- Color proofing allow you to make new color profiles on your needs with the build-in color proofing tool.

Visit whiterip.com to see all the software features.

WEB SITES

OUR PORTALS ON THE WEB

SER.TEC and DPI DG Printing are present on the web, you can find us on our official site:

www.dpidgprinting.com

From the presses, to the screen printing machines, from digital printers to dryer systems, on **dpidgprinting.com** you will find the data-sheet of each of our machines, with the possibility to see the video, download the brochures in pdf format to know them better.

You will also be kept informed about news, events, trade shows and everything that revolves around Ser.Tec's universe.

Also don't forget to visit our's satellites sites, dedicated to the partnership brands of SER.TEC. and DPI DG Printing :

- **www.eagleuvled.com** Dedicated to Eagle printer range for UV LED printing
- **www.beled.it** Dedicated to BELED printer range for UV LED printing
